Federal Government funding boosts provision of community facilities

Australian Government
Department of Infrastructure, Transport,
Regional Development and Local Government

Regional and Local Community Infrastructure Program

The Federal Government has given a huge boost to the Australian economy by injecting \$300million into Community Infrastructure across the country.

If you haven't got all the information you need about this program go to: http://www.infrastructure.gov.au/local/rcip_guidelines.aspx

Lake Alexandra Park, Mittagong

Willow Park, Hornsby Shire Council

Guest Park, Fairy Meadow gets Wollongong's first Trike City

As well as a beautiful new Premium Metro play structure the new look Guest Park playground has a brand new Trike City play area.

The concept behind **Trike City** is to maximise the benefit of the wetpour rubber surface by encouraging small children on bikes and on foot to interact and role play.

Another benefit is that the children become familiar with important road safety signage.

Project Play!

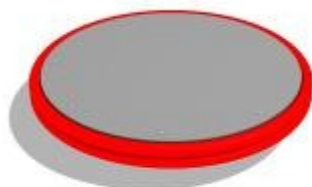

January 2009 - issue 4

With new Moduplay Spinpoint Spinner the fun goes on and on...!

Children develop strength and co-ordination skills while they have a lot of fun on Moduplay's Spinpoint Twista, Spinpoint Maypole and Spinpoint Saucer!

More info sales@moduplay.com.au

Tough recycled plastic playground border removes the maintenance factor for organic soft-fall edging.

This all new design overcomes the problems that are commonly experienced with plastic border edging.

Installation is fast and simple. Each panel has its anchor spike clipped into the back of the panel saving space for freight and ensuring it is there when about to be installed.

The panels are 1200mm x 300mm x 100mm and very affordably priced.
